COURSES TAKEN TOGETHER

SharedCourseValuedEdgelist.csv

Variable	Definition	Values
PARTID	Participant ID number	Four digit ID code
Alter	ID of each other student (with the exception of the participant) in the study	#### = ID Code of the alter NA = Student did not participate in w4; as a result, did not provide consent for release of academic records for classes taken Spring 2015 through graduation
Degree	The number of courses the pair (or dyad) of students were enrolled in together	Integer from 0 to 15 NA=one or both of the students in pair did not provide consent at wave 4 for record of course enrollment

SharedCourseAffiliationMatrix.csv

The data in this file are presented as an affiliation matrix. The row and column headers represent participant ID codes for all students in the MSW program. Value in cell x_{ij} is the number of classes that student *i* and student *j* took together in between Fall 2014 and Fall 2015 inclusive. If x_{ij} =NA then either *i* or *j* did not consent to release of course enrollment data. Values in the matrix diagonal (i.e., x_{ii}) show the number of classes student *i* took.
